

Predictability

Clarity

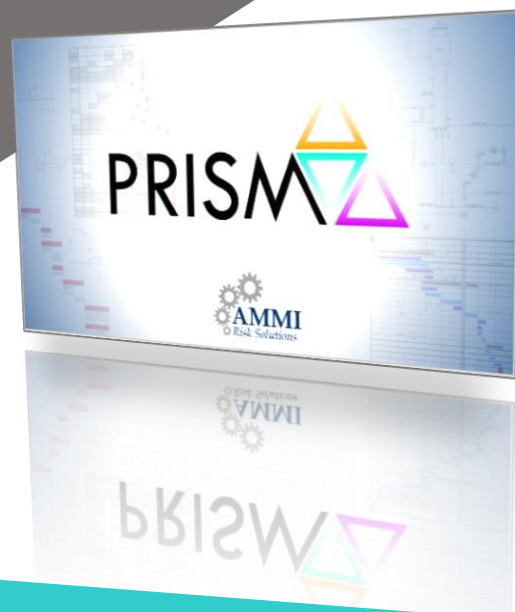

Solutions

Predict and take control of change at your facility with PRISM

PRISM is unlike anything you've seen before.

It reveals the precise availability impact across your facility of any equipment downtime, with complete certainty. Now, or for any future configuration. It shows you how to recover. All in real time.

And it's ready to save you money.

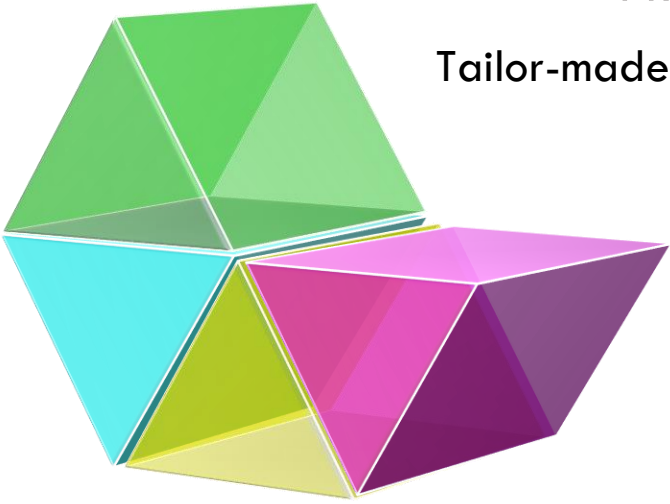

Put PRISM to work for you

- React to changes quickly and decisively
- Schedule outages with complete confidence
- Preempt outage supply & resource issues
- Demonstrate full safety system risk control
- Learn once, retain forever
- Experiment in offline sandboxes

Tailor-made with features for you

-  Outage & maintenance
-  Emergency planning
-  Safe shutdown
-  Operational simulator
-  Fire hazards analysis
-  Systems interdependency
-  Fire response
-  Occupational safety management

Turn complexity into certainty

Your facility isn't in need of more data. It's everywhere – pouring from management systems, planning tools, and software that reorganizes and redistributes it. The real challenge is to cut through the clutter and truly put your data to use.

PRISM doesn't add to the noise with metrics. It compares your current data with its fully interconnected model of your facility, spotting every conflict and proposing solutions.

Optimized and predictable outages

An end to configuration surprises

Streamlined planning and review

Unparalleled risk management

Less downtime

Superior emergency response
